About the organization

This logo symbolizes the objectives of the organization.

- The words in the outer circle are from the great Indian epic "Mahabharat", saying that "Nothing is above a Human being". This is also the motto of the organization.
- The triangle in the inner circle symbolizes the hands of three people and stands for community development through participation.
- The light from the lamp in the small but in the centre symbolizes the development of the weakest and poorest person of the community.

Founder trustees of the organization were inspired by Gandhian thinking and work of great men like Albert Schweitzer. They felt deeply the agony and hopelessness of poor villagers. They saw the plight of villagers and felt a need of medical services in these villages. Hence they brought like minded friends together and founded Gram Seva Trust, an organization dedicated to rural health and development.

In 1994 the trust started a 30 bedded hospital with 5 staff members in an old dilapidated building, given by another trust. As the need arose the hospital was expanded to accommodate more patients and better services. Today the hospital can accommodate 100 patients and has all basic facilities required in a rural hospital providing health services at affordable rates and sometimes free of charge to the needy from nearly 300 surrounding villages of Navsari and Dang districts.

The organization also wanted to improve health of the surrounding villages hence as and when need was identified different community projects were started in the surrounding villages with main focus on health and development of women and children. Immense efforts are put in to decrease malnutrition. Gram Seva Trust also reaches out to the tribals in deep interior villages of Vansda and Dang through satellite centers and general medical mega camps arranged every year.

The organization has also started different projects for development of villages like income generation activity, trainings for income generation activities, adolescent girl project, tutorial classes to strengthen primary education and a Child Education and Development Centre to improve standard of education in children of landless labourers.

Vision

- Healthy, Happy, Self sufficient and Self-Empowered Rural communities.

Mission

- Cater to the Health need of every individual in the society irrespective of caste, creed or economic status.
- Render special care to women and children of our society.
- Promote curative and preventive measures in order to improve the general well being of the society.
- Uplift social and economical status as well as rural development with scientific and rational approach.
- Create awareness for healthy qualitative life and development.

Editorial

Hello friends,

We are grateful for your invaluable support and guidance for last 31 years. Since 1994, along with health services, the organization has been continuously working and striving to carry out all-round development activities in the villages of Navsari, Surat, Tapi and Dang. We are pleased to present our 31st Annual Activities and Accounts Report to you with all the information on the various activities of the organization during 2024-2025.

In addition to providing health facilities in the remote areas of Dang, the organization has also initiated many activities for women and child development there. The scope of which will also be expanded with new projects in the coming days

It is challenging for an organization to function in a rural area, where skilled staff like doctors, nurses, technicians and other professionals are not easily available. Most want to work in cities. At the same time other challenges like frequently changing government rules and their complexities make it difficult to implement various schemes so that poor and needy patients can get the benefit of the same treatment. We are happy that despite these challenges, we have been able to keep the organization strong through your cooperation and support. You have been selflessly associated with the organization till now and through you, the organization has also received new well-wishers and donors. In the coming years, we request you to continue your support to expand the scope of our services.

We look forward to your suggestions and opinions and would love to meet you & wish you visit our campus and review our activities.

Thank you,

Dr. Ashwin Shah,

(Founder & Managing Trustee)

On behalf of the Trust Board.

Dt. 14-12-2025

Place: Kharel.

We request you all to visit our websites

Hospital Services

Nearly 90000 patients were treated in our OPD this year.

Rural and tribal areas need medical services, at close proximity and at nominal rates. The basic objective of the organization is to meet these health needs of the community. Hence the organization has set up a 100-bed hospital in rural area of Kharel. The hospital is well equipped and functioning 24 x 7 to meet the growing needs for various health services in general medicine, surgery, obstetrics & gynecology, pediatrics, ophthalmology, orthopedics, ENT, ophthalmology, dentistry, psychiatry, skin, etc. Facilities like physiotherapy, dialysis, ICU, NICU etc. are available at very affordable rates. People from more than 300 surrounding villages benefit from these services. Patients with chronic diseases require long term checkup and medication which they cannot afford and become defaulters. Hence in our OPD not only consultation is at minimal cost but we also dispense free medicines to patients.

Every Thursday we run a Sickle cell clinic in which 180 patients were checked regularly

Antenatal Care:-

4355 Pregnant women were provided free treatment and medical services during their pregnancy.

Delivery of a woman is considered as a new life for the woman as pregnancy and delivery can become risky and life threatening sometimes. Hence during this period, a woman needs constant supervision, treatment and guidance from experts. Our hospital

conducts free ANC clinic thrice a week so that tribal and rural women also get modern medical services

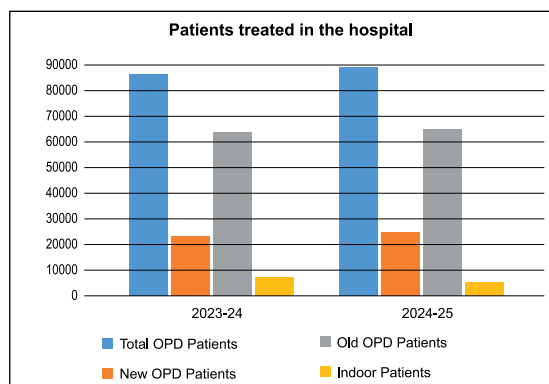

Table 1: Hospital Statistics

Department	2023-24	2024-25
Consultations	88233	86393
Surgeries	3074	2951

Snakebite treatment	90	75
Free food dish	68071	67707

from the first month of pregnancy. In addition to this 24 x 7 arrangements are available for delivery. A total of 1055 pregnant women were delivered this year out of which 72.7% deliveries were free of charge.

Approximately 58% of the deliveries conducted were Normal and 42 % of deliveries were by cesarean section. About 56% of deliveries were complicated which includes deliveries of women with sickle cell disease, ectopic pregnancy, severe anemia and high blood pressure. If such women do not receive timely and intensive care, there is a possibility of maternal death during or after delivery. Our hospital functions as a referral hospital where complicated cases of delivery are referred to. This year we were able to save 18 pregnant women with complications.

Every Tuesday patients are examined, treated & given guidance in Infertility Clinics by experts.

Every month we conduct maternal & child death review meeting with hospital & community staff to discuss mortalities or near miss deaths and how to prevent them.

Neonatal Intensive Care Unit NICU):-

282 sick newborns received intensive neonatal care this year.

Babies who are born pre term, who have low weight at

birth (<2.5kg) or who have had complications during delivery, mostly require intensive care to save their lives. Usually, such facilities are available only in urban areas and in private hospitals, which is not affordable for rural - tribal families. In order to ensure that even the needy children get this lifeline service close to their mother and immediately, Neonatal Intensive Care Unit is available at our hospital with services at a very concessional rate or free of charge depending on the economic condition of the family. This year, 282 newborns needed this facility, out of which 268 were discharged. Thus 95% of the total newborns admitted were saved. After the babies are discharged, they are followed regularly up to one year of age and families are regularly called and reminders given for follow up appointments with specialists. This year, a total of 240 babies out of 268 (89.5%) came for their regular follow ups. Our field workers also visit the babies at home & counsel their families.

Dialysis Division:-

Total 3049 dialysis sessions for 59 chronic kidney disease patients were done this year. Of which 2988 sessions were free.

Chronic kidney disease patients from rural areas have to travel far to avail dialysis services, which can be time-consuming and expensive. Our dialysis centre has provided easy access to affordable dialysis

A+++ High Risk Pregnancy Care Centre

This July our hospital has been certified as A+++ High Risk Pregnancy Care Centre by the Federation of Obstetric and Gynaecological Society of India. This is a great achievement and we are proud of the hard-work and dedication of our Obs and Gynae team and hospital staff due to whom this could be achieved.

Great efforts to save a newborn baby in rural area.

28-year-old Seemaben (name changed) was 6 months pregnant and prematurely delivered a baby girl weighing 700 grams. The baby born prematurely was severely low birth weight. Since the lungs and other organs of such newborns are not fully developed, they can face many health problems. That is why such children have to be kept in a warmer in NICU for intensive care. Children weighing less than 1 kg usually cannot cope with these health issues and die. Usually, in big cities, under the supervision of big team of specialist doctors and with all facilities, there is a slight chance of survival after expensive treatment. But a poor rural family cannot afford to go to the city. That is why this child was kept in a warmer in our NICU for 26 days and given intensive treatment under the supervision of pediatric specialists. After 26 days of efforts, the child's condition improved. So the child was given to the mother in the ward outside the neonatal intensive care center. The child still needed to be monitored and the mother to be taught how to take care of the child. The child was treated in the ward for 14 days. Kangaroo care was also given by the mother. After 40 days of treatment, the child now weighed 1.450 kg and was discharged. The cost of 40 days of treatment in cities is in lakhs but in our hospital it only cost 60,000 rupees. The family did not have the capacity to pay that amount, so they were discharged after paying Rs.20,000 only, as per their capacity. The baby comes for check-ups every month and is gaining weight and improving. We are glad that we were able to treat and save such a low birth weight baby in a rural setting.

Table 2: Eye Department

Camp Details	Donors/ Support
Total Camps:12 Total patients examined in the camp: 724 Total Cataract Surgeries:199 Total spectacles distributed: 265	<ul style="list-style-type: none"> • Mrs. Sudhaben and Mr. Bharatbhai Kothari (U.S.A.) • In memory of late Mrs.Manjulaben Gunwantrai Desai by Mr.Gunwantrai N.Desai (U.K.) • Mrs. Nirmalaben and Mr. Rameshbhai Shroff (U.S.A.) • Niko, Layla, Jay and Sumeru Naik family Devdha (USA) • Mrs. Sushilaben Arvindbhai Patel (U.K.) • In memory of the late Mr.Dhirubhai Jinabhai Naik and late Mrs.Kantaben Dhirubhai Naik (Kacholi) by Mr.Bharatkumar Dhirubhai Naik (Valsad) • Shri Jalaram Utsav Trust Vadodara by Mr.Jagdishbhai Parikh. • Shri Samast Leuva Patidar Samaj Trust, Navsari • Mrs. Vishakha and Mr. Deepak Zaveri (Chicago - U.S.A.)
	In Collaboration with Drishti Program, Government of Gujarat. District Blindness Control Society, Navsari. Rotary Eye Institute, Navsari.

Note: The above figures are information of Eye camps in the hospital

sessions to the villagers. Many patients need this facility regularly and for longer duration to increase their longevity which can be expensive for the families. Hence the organization has been affiliated with Ayushman Yojana (Government insurance scheme) so that such patients receive free services. Patients under this scheme, not only receive free dialysis services but also receive travelling allowance for each session thus helping them to come for regular sessions and remain compliant.

Eye Department:-

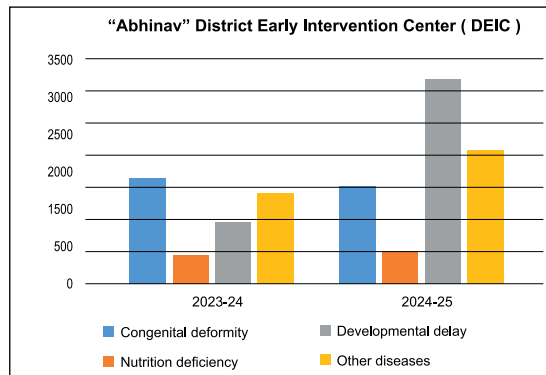

199 patients received new vision from our free cataract camps this year.

Cataract is a major health problem in the elderly gradually making them dependent on others. Our 'Sukhabhai Govindbhai Eye Department' caters to eye problems of the community through regular OPD and camp services. A total of 724 patients were treated in camps this year out of which 265 were given free spectacles and 199 surgeries were conducted.

Free eye camps are organized every 2nd Saturday of the month, where patients are checked, operated & given spectacles without any charges.

"Abhinav" District Early Intervention Center (DEIC):-

6797 children aged 0 to 18 years were provided with proper diagnosis, treatment and advice for developmental problems, congenital deformities, nutritional deficiencies and severe illness at no costs.

In collaboration with National Child Health Program, Health and Family Welfare Department, Government of Gujarat (Under RBSK), the District Early Intervention Center was established in premises of the organization at Kharel in Navsari District and is functioning since last 4 years. This center provides facilities like early detection, diagnosis and treatment of children from birth to 18 years who have any birth defects, mental and physical development delays, nutritional deficiencies or any other childhood diseases. All these problems seen in children are examined by specialists such as pediatricians, pediatric nephrologists,

Intense efforts and risks taken to save a man's life

Hareshbhai (name changed) resident of Surgana block in Maharashtra met with a road accident and suffered fractures in his right upper and lower limbs. He was an alcoholic so nobody paid any attention to him. When his suffering increased he was taken to the local healers but no relief was obtained. Hence one month after his accident he was brought to Kharel hospital for treatment. Along with his fractures he was now suffering from weakness and distended abdomen. He needed surgery to treat his fractures but on examination he looked severely pale and his haemoglobin was very low. He was immediately given blood transfusions. A total of 7 blood transfusions were given. His sonography and CT scan reports showed that he must have had an abdominal injury also, due to which he had lost lots of blood and there was a huge pool of blood collected in his abdomen. He needed immediate abdominal surgery to remove this pool of blood. His fractures could not be treated till this huge blood clott was removed and he was stabilized. But seeing his condition it was very risky. His relatives were explained about the risk and possibility of death and after their permission he was operated and the blood removed. After 4 days of intensive care his condition improved. One month after his admission he was now stable to be operated for his fractures. He underwent 3 surgeries to treat his fractures. His haemoglobin levels again dropped. Hence he was given 3 more bottles of blood. Thus after 4 surgeries and 10 bottles of blood and stay of 1 month and 24 days he was discharged. He came back regularly for his follow up and can now walk without any support.

pediatric ophthalmologists, dentists, ENT specialists, orthopedics, neurophysicians, physiotherapists, special educators, audiologists etc. Facilities like speech therapy, physiotherapy, 2D echo, occupational therapy etc are also provided. 2Decho camps are conducted every two months and children are checked by a cardiologist for early diagnosis and management of congenital heart disease. Parents of children are counseled regularly regarding their health problem, its management, duration of treatment etc to prevent delays and achieving optimal development of child. Children are also referred to higher centres for further management if needed and supported throughout the process.

"Maa" Devi Annapurna Bhojnalaya:-

A total of 67,707 free meals were given to patients and their attendants through our hospital kitchen service this year.

With the aim of ensuring that the patients admitted in hospital receive hygienic and healthy food on time, the institution had started the Annapurna Bhojnalay. Indoor patients and their attendants are given two nutritious meals and two times milk free of charge. Others are provided food at very concessional rate. Donations are also accepted from donors to give food on anniversaries or special occasions.

Financial relief for patients:-

This year 50.11% relief of Rs. 5,18,40,660/- to poor patients admitted in hospital and free medicine worth Rs. 21,97,283 /- to all O. P. D. patients was given.

Majority of the community in villages surrounding the hospital is poor and many a times delays seeking treatment due to economic conditions. The organization has always aimed to help such needy people. No patient is deprived of treatment due to poor economic conditions. 70 to 80% of the patients coming to the hospital are rural, tribal farm labourers. As you are aware the treatment available in the hospital is at affordable rates and since last nine years patients in O. P. D. are given free medicines with the financial support of donors. We thank all our donors for their continuous support and hope that it continues, thus helping us serve the needy patients.

'Clinic in Suitcase' for Cervical Cancer:-

Keeping in mind the health of poor tribal women around the institute as well as in the Dang region, Gram Seva Trust, Kharel, Mangala Prem Trust – USA, Rotary Club Gandevi, jointly started Cervical Cancer Clinic (Clinic in Suitcase). Women are screened by VIA method for cervical cancer and free Pap smear test done if cervical cancer is suspected through VIA method. Patients with cervical erosions are treated with Cryotherapy which is OPD based treatment, easy, painless and has no side effects.

Cervical cancer is also a common cancer in women. If this disease is diagnosed on time, the disease can be prevented from progressing. A total of 521 women were screened this year. VIA was done in 505 patients and Cryotherapy done in 23 patients. These services are available in the hospital every Thursday.

Services in Interior Areas

Satellite centres

7299 tribal patients were treated at our two satellite centres in Dang district.

The remote, tribal population of Dang has to travel more than 100kms for quality medical services due to inadequate health services available in the district. Our hospital reaches these patients through our satellite

centres at Shivarimal and Waghai. Every Thursday and Friday our team of doctors and paramedical staff visits these centres and conducts medical dispensary for the patients. Villagers from neighboring Tapi district and Maharashtra state are also taking advantage of this service. A total of 100 visits were conducted to these centers this year. 159 patients were brought to Kharel for further management. Patients are also provided to and fro transport services to the hospital.

To facilitate ease in administration of our health and development activities in the interior villages of Dang, we have set up office in rented building in Dang.

Table 4: Satellite Centres

That which is false troubles the heart, but truth brings joyous tranquillity

■ Rumi

Community Health Services

Gram Seva Trust Kharel strives to reach the poorest and the most vulnerable section of the society to improve their health and cater to their health needs. The organization implements outreach health projects in villages of Navsari and Dang districts where poverty and lack of education is prevalent. Village health workers are trained to screen and manage people for health problems like malnutrition, anaemia, hypertension, diabetes, mental health etc. Rational and scientific information about diseases is also provided through health awareness activities in the following projects.

A) Child Health and Nutrition Project

2553 children have been provided treatment and their parents counselled to eliminate malnutrition.

Malnutrition in children is common in rural areas due to which not only their physical and intellectual development is affected but also children fall sick frequently. Malnutrition is caused due to various

factors like poverty, superstition, low education, young parents, infectious diseases etc. The organization has adopted 100 Anganwadis in 22 villages of Navsari district where, health and nutrition training is provided to Anganwadi workers and village health workers who visit the families of all enrolled children aged 0 to 6 years and counsel them regarding child health care and nutrition. Nutrition demonstrations, parent meetings, children's checkups, meetings of pregnant and lactating mothers, health exhibitions and screening camps are organized to eradicate malnutrition. (Information Table No. 5)

B) 'AANGAN' Project

The period from birth to 6-7 years is very important for the physical and intellectual development of children. About 80% of the mental development of children occurs in first 2-3 years of age. A good nurturing environment is necessary for optimal development of children. With the financial support of Gujarat Chemical Port Limited (GCPL), Dahej and the technical support of Surat Pediatric Association Charitable Trust

Table 5: Child Health and Nutrition Project

(SPACT) and Nutan Bal Shikshan Sangh, Vadodara, the AANGAN project was started a year ago. In collaboration with the Integrated Child Development Scheme Department, this project provides early childhood nurturing care and responsive parenting education to parents and caregivers of children in 49 Anganwadis of Chikhli Taluka and then encourages them to continue these activities regularly through home visits. (Information Table No. 6)

C) Antenatal Care Project

702 pregnant women were followed and counseled for a healthy pregnancy and safe motherhood.

In rural areas, women face health problems during pregnancy due to anemia, malnutrition, poverty, poor health awareness, teenage pregnancies etc. To alleviate the problems of women during the crucial period of pregnancy, the organization runs free Antenatal clinic 3 days a week in the hospital to ensure that they get the necessary care and attention and health workers follow them through home visits in the villages. During the home visits, pregnant women, lactating mothers and their families are counselled regarding antenatal care and prevention of high risks. Meetings of women are also organized at village level and awareness is spread in the community regarding pregnancy care and safe motherhood. (Information Table No. 7)

D) Adolescent Health Education Project

973 awareness sessions were conducted for adolescent girls and boys regarding health, menstrual hygiene, nutrition, anemia, reproduction, addictions, safety etc.

Adolescence is a phase when youth are confused and have many queries regarding the physical and mental changes they are experiencing. For healthy development of adolescents, it is necessary that their

questions are answered and correct and scientific information is given to them. Our village health workers screen adolescents for malnutrition, anaemia and other illness and at the same time educate them regarding their physical and mental changes and care to be taken through various awareness sessions in schools, ashramshalas, technical institutions etc. This year more than 1100 adolescents have attended these sessions every month. (Information Table No. 8)

E) Non-communicable Disease Project

More than 3543 patients with diabetes and high blood pressure were followed for management and compliance in treatment.

Due to modern lifestyle, food habits, diabetes and high blood pressure diseases are being seen in every household at an early age. Even in rural areas, these diseases, which used to occur in later ages, are now seen in twenties. Lack of timely treatment, compliance in medicines and lack of awareness leads to complications like heart attack, paralysis, blindness, stroke, kidney disease, etc. Our village health workers conduct door to door screening of all people aged 30 years and above in 22 villages of Navsari district to

Table 8: Adolescent Health Education Program

Perplexities of Adolescence

Nalini Halpati (name changed), 17 years old and studying in standard 12, fell in love with a boy named Vijay (name changed) living in a nearby village. The family members were against it, so Nalini quarreled with them and left home and her education to live with Vijay. Nalini's parents now informed the police. The police advised both of them to complete their education and then get married. When the organization's health workers, came to know about this, they visited Nalini and Vijay and explained to them the harm in getting married and having a child at a young age. They were advised to complete their education. By this time, the school principal also came to know about them. He advised Nalini and her parents to complete Nalini's education. The effect of everyone's repeated advice and home visits was that Nalini returned to her parents' home and started going to school again. Nalini has passed her 12th board exams this year.

detect patients early, start their treatment and prevent complications. Along with this, health workers conduct home visits, check the blood pressure and blood sugar levels every month and counsel patients and their relatives regarding care and regular medicines. Community awareness sessions are conducted in villages to increase public awareness about these diseases and bring lifestyle changes to prevent them. We are thankful to UHRU (USA) for their financial support to this project. (Information Table No.9)

F) Mental Health Project

This program has initiated treatment for 194 mental patients, out of which 25 patients are rehabilitated and take care of themselves and work as before.

The organization has been working in Kharel area and then Dang area for the last 4 years with the aim of increasing awareness among people about mental

A ray of hope in the life of a young man

Kantibhai (name changed) was an intelligent youth studying in 10th standard when his parents passed away. Since then he became mentally unstable and aggressive. In the early days, the people of that village used to beat him and hence his elder brother restrained him at home by chaining him. However, Kantibhai would sometimes break the chain and run away. He was started on psychiatric medicines from civil hospital but he stopped taking the medicines and his condition worsened. He now started wandering aimlessly day and night. At present 27 years old Kantibhai still wanders away but comes back to his elder sister who also lives in the village to have food. Our village health worker frequently visited and counselled his sister Kokilaben (name changed) to restart his treatment. She agreed and hence after a video call with the psychiatrist at Kharel Hospital medicine were given to her. Kokilaben used to give the medicine to Kantibhai by mixing it with his rice and lentils. Initially he became suspicious and slapped her hard due to which she cannot hear properly in one ear. But she was persistent and gave him medicines regularly and gradually Kantibhai's mental state improved. Today he works as a farm labourer and has started earning his livelihood. He even visits the health worker to collect his medicines every month. He was given medicine free of cost for three years but now since he is working we are charging him 25% of the medicine cost. Kantibhai tells his sister that he will pay for his medicines. Kokilaben is very happy that her brother has recovered.

health, early diagnosis of mental health patients and early initiation of their treatment. Mental health problems are a stigma in society, people tend to hide such information and hence our village health workers conduct surveys through home visits for early diagnosis of patients. Patients are given medicines at subsidized rates to increase compliance in treatment. Efforts are also made for social rehabilitation of patients through family and community counseling and education. At present, 144 patients are taking regular medicines and 14 patients have completed their treatment. Our sincere thanks to UHRU (USA) for their financial support to this project. (Information Table No. 10)

G) Health Education Activities

575 health awareness sessions were organized in Kharel Hospital.

80% of health problems arise due to lack of health awareness in rural areas. Health education activities in the hospital and community are the foundation of all the programs run by the organization. Health education sessions are organized for patients and their relatives in the hospital in the evenings when relatives and patients are free. (Data Table No. 11)

Table 11: Health Education Activities

Rank	Different Sessions	Total
1	In Hospital ward	287
2	Before ANC clinic	150
3	In 'Jatan' Clinic for Post-natal care	43
4	Evening health education in hospital	83
5	In Eye camps	12

H) AAA + Project (Tribal Health Care and Economic Development Project), Dang

Patients from Dang travel more than 100 kms. for major and minor illnesses and surgeries. Malnutrition, anemia, non-communicable diseases, infectious diseases, skin diseases, eye diseases, etc. are prevalent in Dang district hence Gram Seva felt the need to implement outreach health activities in this area. With the financial support of K. R. Shroff Foundation (Ahmedabad), 25 villages have been adopted in the first phase and 16 villages in the second phase in Dang district. Various health care and economic development activities are being carried out by village level workers in these villages. Workers conduct home visits to survey and screen for illness, refer patients for treatment to health centres and follow them to monitor their compliance. Workers also spread awareness about diseases like diabetes, high blood pressure, acidity, piles, snake bites, menstrual hygiene, fever, diarrhea-vomiting, malnutrition and anemia through health education activities in the villages. We also conduct mobile clinics in these villages (every 3 months) where patients are treated at minimal fees of Rs.10 and children are given free treatment. (Information Table No. 12)

Table 12: AAA+ Project

Sr.	Particulars	2021-22	2022-23	2023-24	2024-25
1	Total Mobile Clinic	29	48	45	48
2	Total patients	3936	5475	5993	5954
3	Average patients per clinic	140	114	136	124
6	Referred patients	627	403	204	251

People in our village were not aware about Blood pressure, diabetes, anemia, piles, menstrual problems, or childcare. But when Kharel hospital assigned me the responsibility of educating people about all these issues, I agreed and conducted awareness meetings and home-visits. As a result, today our villagers understand these health problems, and if such issues suddenly arise, they are now aware of where and how to get basic primary treatment. Not only in my own village, but I have also informed many patients from nearby villages. Some of them come to Shivarimal van arogya Kendra for treatment, while others visit during the health clinic organized in our village and receive treatment there. Many have recovered as well and that too at a very low cost. Some people from our village had to undergo major surgeries, and even those were done successfully at Kharel hospital. They are now completely healthy. Because of all this, I feel proud and happy to be working with Gram Seva Trust, Kharel. I hope that other nearby villages also get a dedicated health worker so that poor people can receive proper guidance.

■ Heenaben
Lahan, Barda village

I had high blood pressure, but I was not taking any medicines. The health worker from Kharel Hospital, who works in our village, always advised me to take my medication, but I was not ready. One day, my health worsened, and I was taken to a private clinic. There, I was given blood pressure medicine, but it was very expensive and I could not afford it.

At that moment, I realized that whenever the Kharel Hospital outreach clinic was held in our village, the health worker would always call me and remind me to start my treatment. If I had started my medicines then itself, it would have been cheaper and I wouldn't have had to go through this trouble.

I immediately told the health worker that I wanted to start my treatment. She asked me to come to the clinic on Monday. After my check-up, the medicines were started. Now, I take my medicines regularly and my blood pressure is under control. I am grateful to Kharel Hospital.

■ Devarambhai Sonyabhai Pawar,
Chikhli, Dang

Continuous Loving Guidance brings Positive Change in Patient's Behavior and Health

Rameshbhai (name changed), age 65, had been taking blood pressure medication from a private clinic for two years. However, he was addicted to alcohol and tobacco (gutkha). When the organization's health worker visited his home and checked his blood pressure, it was always high. When asked about his medicines, Rameshbhai gave vague answers. The village health worker visited him regularly and always advised him repeatedly to quit his addictions but he would not listen. A few days later, it was learned that Rameshbhai's health had deteriorated. He experienced dizziness, chest pain, and weakness, and was unable to work. The health workers visited again and advised him to come to Kharel Hospital for check-up, but he did not agree. After repeated visits and convincing both Rameshbhai and his family, he finally agreed one day and came to the hospital. Upon examination, it was found that Rameshbhai's blood pressure was extremely high, and this had begun affecting his kidneys. The doctor advised him to take his medication regularly and to quit his addictions. During every follow-up visit, the health worker also explained the dangers of uncontrolled blood pressure and encouraged him to stop drinking and chewing tobacco. In the beginning, Rameshbhai took his medicines regularly but continued his addictions. Regular intake of medicines started improving his health. Seeing these positive changes, he eventually quit his addictions as well. As a result, all his symptoms gradually reduced. During monthly check-ups, his blood pressure started to remain normal. Now he is happy that his health has improved, and he continues to take his medicines and comes for regular check-ups.

*When we do the best that we can,
We never know what miracle is wrought in our
life or in the life of another*

■ Helen Keller

Rural Development Projects

New Efforts/Projects:-

As we move forward in our work towards rural development, newer community needs are emerging and to meet these needs, we are continuously making changes in the existing programs.

This year an Integrated project for Women development and Environment was implemented on a pilot basis.

About 325 women from 25 villages of Navsari district and 40 villages of Dang area will be given various trainings in agricultural skills in mushroom cultivation, kitchen gardening, fruit and vegetable plants nurseries and environment conservation to enable economic development of their families.

A sustainable development model is being developed through planting techniques, bio fertilization, drip irrigation and the use of solar cookers. This program has received financial support from Gujarat Chemical Port Ltd, Dahej. This year, the program was started by distributing solar cookers to 21 women and kits for making vermicompost on a pilot basis to 25 women.

"We did all our farming and housework and then cooked after 8 pm in the evening. Hence we always had dinner late by 10pm. Thanks to the solar cooker in which we keep food for cooking in the morning and everything is ready when we come back from work and we eat by 8 pm. Along with saving wood, I have also saved my time."

■ Hiraben, village Supdahad, Dang

Rainwater Harvesting Recharge Project:-

"The first benefit of adopting this method was that as soon as it rained this year, we were able to get water in our borewell compared to last year when we got water after a month of rains. Surrounding women too were allowed to take water so they did not have to go far away for water."

■ Danielbhai, Village Manmudi Dist Dang

We all know that one of the best sources of water is the underground water source. But in recent years due to indiscriminate use of groundwater, these levels are going down considerably. The easiest way to recharge this source is to artificially pump rainwater into the groundwater. In districts like Dang with high rainfall, there is shortage of drinking water in summer, due to hilly, rocky terrain and flow of water downhill to lowlands. This has direct impact on development of community. As a solution to the water problem in this area, we launched a "Water Bore Recharge" project. In this project, which was started on a pilot basis, rainwater was collected from roofs of 27 houses and connected to their bore wells respectively. About 1200000 liters of water has been collected and transferred to the ground successfully. We are thankful to Greenway Infrastructure Pvt. Ltd. For funding this project and seeing the positive response, we plan to implement this project on a larger scale in coming days.

Women's Empowerment

Skill development program

A very important aspect of women empowerment is to develop various skills in women. Skill development helps in empowering an individual in many ways. It is especially important in increasing self-confidence and self-esteem, which play crucial role in the socio-economic development of women. Therefore, economic skills such as training in sewing, mushroom cultivation, nursery development, financial literacy, health development, entrepreneurship development have been organized.

Sangi Sewing Classes:

I was a homemaker. I always felt the need to do some other work, but I didn't know what to do? I joined the sewing class and gained new horizons. I have now started a shop in a rented place and turned my skill into a business and I am proud to move forward.

■ Sonalben Rajeshbhai Patel, Gandeva

257 women received training in sewing skills through our mobile sewing classes in villages. A total of 11 classes of three and a half months duration were organized in villages which saved travel time and expenses of about 4 lakhs rupees. About 100 women who received training in these classes, now earn money and support their families.

This program has received financial support from Manav Kalyan Trust, Navsari, and The Desai Foundation, USA, and other donors.

I learned to sew on a simple machine, but when I went to get a job in a company, I was asked whether I could sew on a commercial machine. I learnt sewing on commercial machines in the advanced sewing class. Due to which I got a job in an apparel factory and today I earn about Rs. 9000 to 10000 per month.-

■ Nikitaben Merwanbhai Patel, Kangwai

Sangi Advance Sewing Classes:-

152 other rural women like Nikitaben have learned self-confidence from our advanced sewing class by learning to use the commercial sewing machines.

In the current era, many new technologies have started

becoming available in the market in the field of sewing. These new technologies not only enable work at high speed producing products in large quantities but also are made attractive with better finishing. This keeps cost of production low but increases income. Gram Seva organizes 15 days of advanced sewing courses for rural women after their basic course so that they also learn how to use modern commercial machines

Due to our poor economic condition my husband and I lived in my maternal house. I had some knowledge about beauty parlor hence I was given the opportunity to join the beauty parlor classes as an assistant to the teacher and thus learned new skills. With the skill and confidence gained as an assistant I started taking individual orders and working independently. Last year I earned about one and a half lakh rupees from my work.

■ Amishaben Patel, Kangwai

and earn more.

Beauty Parlor Classes:-

101 other rural-tribal women like Amishaben have received training in beauty parlor classes and now have a new source of income.

Now a days demand for beauticians is increasing even in rural areas. Hence this can be a source of income for rural women if they get training in beautician skills. Gram Seva organized 4 beauty parlor classes in villages to train young women. A start-up kit was also provided so that these women can immediately start earning their livelihood after they finish their training. Thus many women have started earning by setting up their own beauty parlor in their homes. We are thankful

I wanted to be a beautician, but I could not go far away to learn due to my housework. In this class I got the opportunity to learn in my village without going too far and after completing my housework. After the training, I earned an income of about Rs. 30,000 in six months. It was a proud moment for me when for the first time in my life, I was able to give my husband ten thousand rupees, when he needed it.

■ Anjanaben Vinodbhai Patel, Chasa

to GCPL, Dahej Gujarat for supporting this project

Advanced Beauty Parlor Training:-

There is a demand for good quality services even in villages, for which skill training is a must. Keeping this in mind the organization has started Advanced Beauty Parlour Training programs. In these training programs, those who have received basic training and want to learn more and hone their skills are trained by experts. These trainings which generally cost thirty to forty-five thousand rupees, are provided free of cost by the organization. The financial support for this program

There were no vegetable plant nurseries around our village. Hence after our training given by Gram Seva Trust we started vegetable sapling nursery last year and have been earning a good income by production and sale of these saplings and have gained confidence.

■ **Jyotikaben Patel, Bodwank**

has been received from The Desai Foundation, U.S.A. A total of 28 women participated in 2 classes organized this year.

Plant Nursery Trainings

The main source of income of the rural tribal community is connected to agriculture and animal husbandry. If they were trained in different new technologies related to this sector, they can learn new skills and benefit from them. So this year 52 women were trained in home-grown production of vegetable saplings like Brinjal (eggplant), Chilli, Tomato etc. which are in

"Gram Seva Trust, is undertaking new agricultural activities for the betterment of the country and the environment, which as I have seen during my field visits, seem very effective and useful. I am happy that GCPL, Dahej has found such partners for CSR."

■ **Mr. Kapilbhai Patel,**

Manager – GCPL, Dahej, Gujarat

demand in local market. These two training classes were conducted with the financial support given by GCPL, Dahej, Gujarat.

Mushroom cultivation trainings:-

114 women from 36 villages received training in mushroom cultivation and produced Rs. 2,58,000/- worth of mushrooms. 74 women from 23 villages still continue to grow mushrooms to supplement their income. Mushrooms are rich in proteins and vitamin

B12 and considered as a delicacy in tribal regions. However, they are available only during monsoon to tribal community. Growing mushrooms in other seasons will increase the income of village women and

37 years old and educated up to 12th grade, Anjuben says that, "Due to lack of knowledge about banking procedures, I always asked my husband to accompany me to the Bank. But after attending the financial literacy sessions in my village I go alone to the bank and do all transactions with complete confidence."

■ **Anjuben Patel- Chasa**

the entire community can get nutritious mushrooms throughout the year. Hence Gram Seva trains village women and their families in mushroom cultivation, which is supported by GCPL, Dahej, Gujarat.

Financial Literacy Project-

This year 483 rural women became financially literate by attending our sessions in their villages.

A recent study in India shows that though there is rapid economic development in the country only 27% people have financial management skills and in rural areas, this figure is even lower. If people are financially literate, then they will be able to make proper and sound financial decisions every day, due to which their financial position will be strong. Hence people should have preliminary information regarding financial matters like income, savings, investments, real accounts, banking services, government schemes etc. With the aim of providing this information, a total of 20 trainings on financial literacy for women were organized in various villages by Gram Seva with the financial support of The Desai Foundation U.S.A.

Jewellery and Rakhi Making Classes:-

128 women received trainings in jewellery and rakhi making and sold items worth Rs. 79,000/-

Taking into consideration the demand for rakhis and jewellery during the local festivals of Rakshabandhan, Navratri, Diwali etc. women in villages are given training in making various items of jewellery, rakhis and diyas. They are taught new designs, every year, by experts which helps boost their sales and also increases their confidence. We are thankful to The Desai Foundation, USA, for their financial support in such activities.

Income Generation Activities

This year village women earned about 10.5 lakh rupees through the "Gram Sangi" program,

Income generation activities in villages requires training, inspiration, guidance and full-fledged hand holding and support for the village women. The organization's "Gram Sangi Program" not only guides them but also continuously addresses the issues that arise in their journey. All activities required from producing or procurement of goods to their sale and income, are supported in this program. This activity, which started with production and sale of "Sanitary Napkin", now also includes garments, mosquito nets, agricultural tools, etc. Women produce and sell these

products which are the daily needs of rural community and earn money to support their families. This year we also included rechargeable bulbs for sale by village women. Our depot holders sold 67766 sanitary napkins packets this year

Retail Outlet:-

A retail outlet in our premises at Kharel is dedicated to the sale of goods prepared by women involved in different income generation and skill development activities like sewing. Every year women sell their produce through this outlet and also in various exhibitions and fairs. This year they earned Rs. 5,33,855 by the sale of handicrafts and household necessities.

I studied in the Parodh Balawas from Standard 2 to Standard 12. Even after 12th grade, the organization supported me financially to complete Auxillary Nurse Midwife course. Today, I am working as a nurse at Kharel Hospital and am financially independent. If I had not stayed and studied in Balawas, my life would not have been shaped the way it is today.

■ **Priyankaben Halpati, Gandeva**

"Parodh Balawas

78 children from tribal families migrating to brick factories, salt pans and agricultural labour are provided residential facility for education and development in our Parodh Balawas.

"Parodh" Balawas has capacity to house 100 children and is a 'green' building with solar panels and electrical appliances to save energy, water recycling and rain water harvesting etc. These economically poor tribal students face many struggles as they come from migrating labourer or broken families or children of single parents. Hence our focus is not only on education but also character building and overall development of the children. Along with formal education, various

I work at a brick kiln. If Parodh Balawas did not exist, I would not have been able to educate my daughters. The staff of the organization come to the brick kilns, search for the children, teach them, and provide facilities. We appreciate this a lot. I want both my daughters to study well and get good jobs in future.

■ **Ranjitbhai Naika, Alipor**

(Works at a brick kiln in Bilimora Goindi)

Education:-

activities such as picnics, arts and crafts, yoga, sports, cultural programs and other extra-curricular activities are conducted along with celebrations of various festivals for comprehensive value based development of students. 6 students passed their 10th board examination and 1 student passed the 12th board exams this year. 47 students participated and 24 secured position in various interschool competitions at block, district and state level.

"Shikshan-Parab":-

This year about 1,010 tribal children in 55 centers in 51 villages have been supported by strengthening their primary education through our Shikshan Parab project.

Many students from interior rural and tribal village are weak in their studies due to various factors and need support to improve their reading, writing and counting skills.

Our Shikshan-Parab" project caters to these needs of students studying in the village primary schools through volunteers who teach the students outside their school hours. Various tools like games, songs, stories, handicrafts etc are used to create a stress free environment for education.

Efforts were made to increase the love of books among children, through our 'library in handbags' concept where teacher takes story books in her handbag and distributes them to the students who return them after they read the books and the teacher then gets a supply of new books. We are thankful to

K.R. Shroff Foundation Ahmedabad for their financial and technical support to this project which has also been expanded to villages of Dang district.

“Activity Based Child Development (ABCD Project):-

1500 rural children received extra-curricular lessons in environment, life skills, arts and crafts etc. through

games and other activities.

Generally, children in cities are exposed to various extra-curricular activities but rural and tribal children are relatively deprived of such opportunities. Our ABCD project uses different mediums like games, videos, discussions, creative activities etc. with students of 12 schools thus exposing them to different life skill activities. We are thankful to The Desai Foundation (U.S.A) for their financial support to this project.

Consequences of Lack of Awareness

Fifty-year-old Shantubhai (name changed) was working in his field one day when something hurt his toe. He felt it was a minor injury and assumed it would heal in a few days. Many days passed, but there was no improvement. Shantubhai also tried various traditional home remedies, but instead of healing, the wound worsened. He even sought treatment from several local healers, but nothing changed. Our village health worker visited him several times and advised him to seek treatment at the hospital, but he did not take the advice seriously. Thus, five to six months passed by. By now, his foot had swollen and the toe had decayed. A continuous discharge started coming from the decayed part, and his entire foot began to burn with pain. Once again, our health worker tried to convince him to go to the hospital. This time, Shantubhai said that after spending money on local healers for so many months, he no longer had any funds left. The worker explained that every Thursday a bus from Kharel hospital goes to Shivarimal to conduct a dispensary and if he travelled with them, he would save travel costs. At the hospital he and his attendant would be given free meals twice a day and milk twice a day. His treatment costs would also be covered under the Ayushman Yojana (Government medical insurance scheme). The health worker repeatedly counseled Shantubhai and his family members. By now, his second toe had also started decaying, and the pain had become unbearable. After continuous persuasion, he finally agreed and one day travelled to Kharel in our bus. After examination, it was found that because treatment was delayed the main nerve in his foot had suffered severe damage and had completely stopped functioning. At this stage, even surgery would not be beneficial. Thus lack of awareness and delay in management led to irreparable damages.

These 10 years working with this organization have been the greatest blessing of my life. Here, I did not just gain professional knowledge, but I also learned the true meaning of compassion, teamwork, and service to humanity. I realized that health does not improve only through medicines, but also through love, patience, and understanding. Every day here brought a new lesson. Sometimes I found joy in a patient's smile, and sometimes I learned the meaning of empathy through the tears in their eyes.

■ **Kaminiben Patel,**

Community Health Department

Felicitation

For their exemplary contribution towards health of rural communities, Drs. Ashwin and Harsha Shah were felicitated by Shri Piyushbhai Desai and family on the occasion of birth centenary of their father late Shri Indukumar Ranchodji Desai, Navsari.

Dr. Harsha Shah was felicitated by Rotary club of Gandevi and different newspapers in Navsari district on the occasion of International Women's Day for her work in health and women empowerment.

Other Major activities

(1) Comprehensive diagnosis and free treatment camp

To provide health facilities to remote interior villagers and resolve their health problems Gram Seva organized the following comprehensive diagnosis and free treatment camps this year. Free medical and surgical services in general medicine, general surgery, gynecology, pediatrics, dental diseases, ophthalmology, orthopedics, ENT etc. were provided by respective consultants up to one month after each camp. We sincerely thank all our donors who help us reach the under reached population in interiors.(Table 13)

(2) 2 D Echo Camps:

Gram Seva organizes 2D Echo Camps for detection and management of heart problems in children. Dr. Ritesh Sukharamwala (Pediatric Cardiologist, Surat) provides honorary services for these camps throughout the year. This year four 2D Echo camps were organized and a total of 325 children were examined and treated.

(3) Blood Donation Camps:

Patients admitted to hospital, pregnant women admitted for delivery, and individuals requiring emergency medical care often require blood. To meet this need blood donation camp was organized on 15th June 2024, in collaboration with Red Cross Blood Center Navsari. Gram Seva employees, students-staff of L/T Technical Training Center, Kharel, students of ITI Gandeva and villagers from surrounding villages participated in the blood donation camp. Total 60 units of blood were collected.

(4) GO TO PEOPLE-YOUTH CAMP:

This three-day camp was organized by Medico Friendly Circle at Kharel. In which 70 youth from different states of India and studying in medical and paramedical fields participated. Information regarding activities of Gram Seva and other NGOs working in health, was given to the students through field work and discussions with representatives of the organizations. The objective

was for the students to understand different scopes for their career after completing their education.

(5) Internship Program

Gram Seva encourages students to visit the organization for their internships or ongoing trainings to help strengthen the quality of their education. This year following students joined us in various departments.

Department	Number of students
Intern doctor	17
Laboratory Department	02
Physiotherapy Department	45
Nursing	145
Community Health Department & Rural Development Department	03
Students from abroad	01

(6) Information regarding Trustee, Staff and Visiting Medical Services:-

We happily welcome Dr. Pururva Desai (Ear, Nose and Throat Specialist), Dr. Vrishti Gandhi (Radiologist), Dr. Twinkle Patel (Dermatologist) and Dr. Sachin Mahajan (Nephrologist) in our team this year thus increasing our strength to serve the needy.

Mr. Sanjaybhai M. Naik-Gandeva and Dr. Kishorkumar R. Naik-Amalsad joined as tenure trustee and Mr. Dipakbhai A. Vashi has resigned as trustee due to his health conditions but he will continue to serve as invited member of the organization

(7) Tribute

Our sincere condolences to all the families (known & unknown) & friends who lost their loved ones this year. Gram Seva prays for them and will always stand with them in solidarity.

Table 13: Free Gen. Medical and Surgical Camps

Acknowledgement

We heartily acknowledge and thank all for their help and support and we take this opportunity to express our heartfelt gratitude to,

- All the well-wishers and donors in India and abroad who support us in achieving our objectives.
- All the donors, well-wishers and organizers of the fund raising programs held in U.S.A.
- K.R.Shroff Foundation Ahmedabad financial support for AAA+ project in Dang and our education activities.
- GCPL, Dahej for DEIC project, SNCU, hospital up-gradation, project 'AANGAN' and women skill development activities.
- Unified Healthcare for the Rural Underserved (UHRU), U.S.A for their monetary support for Mental Health Project and NCD Project.
- Desai Foundation (U.S.A.) for their monetary support for Sewing classes, Beauty parlour classes, Shiskhan Parab, ABCD project and Financial Literacy and Banking Workshop.
- Manav Kalyan Trust for supporting the Shabri Women's Development Centre and Shri Bharatbhai Desai, Shri Arvindbhai Shah, Shri Ghanshyam Patel, Shri Viratbhai Kothari and Blind school Shivarimal team for their whole hearted support in all our activities
- Mangala Prem Trust, Nalini Shah Cancer Foundation, Shri Ramesh Shah, Anekant Community Centre (U.S.A.) and Rotary Club of Gandevi for support to Cervical Cancer Clinic in Suitcase program.
- Helping Hand of Germany, Shri. Manhar Desai.
- SPACT, AOP (Gujarat) and Nutan Bal Shikshan Sangh (Vadodara) for their technical support, project planning and training to staff in AANGAN project.
- Smt. Nimittaben Bhatt and Dr. Ashwin Patel for their training and Technical support to the Mental Health Project.
- MA Foundation team Vapi for their support to our children development activities.
- KVK, Waghai and Navsari, for technical support and trainings in Vegetable Seedling Nursery and Mushroom Cultivation.
- Greenway Grameen Infra Vadodara for Green Stove Project and Greenway Infrastructure for the rain water harvesting project
- Atul foundation Valsad for donating more than 1500 plants for distribution.
- All Gram panchayat members and villagers and staff for support in the mobile Sangi sewing class project.
- Donors of Gram Seva Foundation (U.S.A.) and Dr. Khushroo Patel and Shri Dineshbhai Shah and family for their active support.
- National Health Mission and RBSK team, Navsari for their support to DEIC services.
- Rotary Eye Institute for regular services to our Eye department.
- Tejas Hospital, Mandvi for the screening and management of eye problems in neonates.
- Dr. Ritesh Sukharamwala (Surat) for voluntary services for our cardiac patients.
- Shri P.J.Desai Trust and other donors for the poor patient relief fund
- Donors, well-wishers, and supporters like principal and staff of school, students and various organizations, who have supported our mega health camps and eye camps
- Shri Thakar, Butala, Desai for their services in Accounts and Audit.
- Techno Quest, Shri Himanshubhai Vashi and his team for technical support to all electrical work, their guidance and equipment for the organization.
- Architect Consultant Shri. Birenbhai Kansara
- Fire Consultant Shri Amitbhai Shah (Value Marketing, Navsari)
- Credibility Alliance for evaluation of the organization.
- Great Place of Work for evaluation of the organization by our staff.
- College of Physicians and Surgeons, Mumbai.

- Blood Donors and Blood Centres of Bilimora, Chikhli and Red Cross, Navsari.
- Other organizations like Gandevi Sugar factory, Manav Kalyan Trust (Navsari), Rotary Club Gandevi & Navsari, Leuva Patidar Samaj Trust (Navsari), Shukleshwar Trust (Anaval), Andheshwar Trust (Amalsad), Lions Club of Udhna (Surat) for their continuous support to our activities.
- State Health Dept. Gandhinagar for their continuous support and motivation.
- District Collector and District Development Officer, staff of Officers and District Health Department, Asst. Charity Commissioner and Staff, DRDA, (Navsari District), District Police Dept, KVK and Agriculture University, Navsari, 108 Emergency ambulance service for their support to all our projects.
- Mamlatdars, Taluka Development officers, Block health Officers, Child Development Project Officers, ICDS staff, Primary Education Officers, Medical officers in PHCs and their staff, Talatis in Chikhli, Vansda, Gandevi and Mahuva blocks, for their support.
- Elected Members of Legislative Assemblies, and Members of District Panchayat, Taluka Panchayat and Gram Panchayat for their support
- Bank of Baroda - Kharel & Khadsupa, HDFC-Chikhli Branch, Axis Bank-Navsari, State Bank of India, Lunsikui Branch, Gujarat Viduyat Company-Gandevi, Telephone Exchange Gandevi, Kharel Post Office, Kharel Out Post, Police Station, Gandevi, Kharel Coperative Society, High Schools of Kharel and Tankal, Gandeva ITI, and Primary School of Khaparia, Toll Booth Staff, Boriach for their continued interest and participation in our activities.
- The editors and the correspondents of various newspapers of South Gujarat for covering the activities of the Trust and dissemination of information to the community.
- Our trustees, full-time and visiting doctors, consultants, our dedicated staff and volunteers without whom we could not achieve anything. Also all doctors giving their services in our medical camps.
- For supporting our activities by their continuous presence and technical support
 1. Dr. Girish Naik, Gadat
 2. Shri. Salimbhai Memon, Waghai
 3. Shri.Monghabhai Desai, Vegam
 4. Smt.Kalaben & Shri.Mayankbhai Desai, Endhal
 5. Shri.Nareshbhai Halpati, Pathri
- All known and unknown persons for supporting the organization.

*Clouds come floating into my life,
No longer to carry rain or usher storm,
but to add colour to my sunset sky.*

AUDITORS' REPORT

(Under sub section (2) of section 33 and 34 and Rule 19 of the Bombay Public Trust Act 1950)

Registration No.: E/896/Navsari

Name of the Trust: GRAM SEVA TRUST

For the year ended: 31st March 2025

We have audited the annexed Balance sheet of GRAM SEVA TRUST [(Reg.No E/896/ Navsari) situated at: N. H. No. 48, At & Post: Kharel, Dist: Navsari 396430] as on 31st March 2025 as well as Income and Expenditure Account for the year ended on 31st March 2025.

We have conducted our audit in accordance with auditing standards generally accepted in India. These standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

1. The accounts are maintained regularly and in accordance with the provisions of the Act and Rules
2. The receipts and disbursements are properly and correctly shown in the accounts
3. The cash balance and vouchers in the custody of the treasurer or trustee on the date of the audit were in agreement with the books of account
4. All books, deeds, accounts, vouchers or other documents & records required by us were produced before us.
5. A Register of movable and immovable properties has been maintained and the changes therein have been furnished to us.
6. All the necessary information required by us has been furnished to us by the Trustees personally whenever called upon
7. No property or funds of the Trust were applied for any object or purpose other than for the object or purpose of the Trust
8. There are no amounts which are outstanding for more then one year and written off
9. For repairs, tenders are not invited but for construction involving expenditure exceeding ₹ 5000/-, tenders are invited
10. The money of the trust have not been invested contrary to the provisions of section 35 of the Act.
11. There is no alienation of the immovable property contrary to provisions of Section 36
12. There are no cases of irregular, illegal or improper expenditure or failure or omission to recover money or other property belonging to the public trust or of loss or waste of money or other property thereof.
13. The provision of Budget to be filed under Rule in the form under Rule 16A is not applicable to the trust. However, the Trust has policy to prepare the Annual Budget.
14. The maximum and minimum number of trustees is maintained during the year.
15. The meetings are held as provided by such instrument.
16. The Minutes Books of proceedings of the meetings are maintained.
17. None of the Trustees has any interest in the investment of the trust.
18. None of the trustees is any debtor or creditor of the trust.
19. The irregularities pointed out by the Auditors in the accounts for the year under audit are have been duly complied with by the trustees.
20. There is no special matter, which we think fit or necessary to bring to the notice of the Deputy or Assistant Charity Commissioner

Gram Seva Trust
Dr. A. A. Shah
(Managing Trustee)

You can help us...

Gram Seva Trust strives for Health and Development of Rural Communities, especially, its weaker sections like women, children and the elderly.

The activities of the organization depend on donations and hence there is a perennial need of donations and help. We sincerely request you to join us in these activities through your voluntary donations in cash or kind for the following:

Permanent Donations Scheme

1. Poor Patients Relief Fund.
2. Eye Care Fund.
3. Bhojnalay(Kitchen) Fund.
4. Women Empowerment Fund.
5. Children's Welfare Fund
6. "Parodh Balawas" Funds
7. Anniversary Donations: these are donations on birth, death or any other anniversaries donated for treatment of food for the patients or food for the patients. The interest on the amount shall be utilised on the same day every year for the same purpose. ₹. 31000/- for this fund is accepted. The Donors name shall be displayed on a board that day.
8. ₹. 2500/- for One Meal for Hospital Patients & - ₹. 3500/- (47 U.S.\$) for Two Meals
9. ₹. 2500/- One Meal for "Parodh" Balawas children- ₹. 3500/- (47 U.S.\$) for Two Meals
10. ₹. 5000/- for Milk for one time for "Parodh" Balawas Children or Hospital Patients & ₹.1000 (16 U.S.\$) for Two time.
11. Eye Camp- An eye camp and free cataract operations of all those coming in the camp are organised on donation of ₹. 50000/- (800 U.S.\$) and ₹. 1500/- (25 U.S.\$) for one cataract operation.
12. Support Education Expense of One Parodh Balawas Child: ₹.42000/year (600 U.S.\$/year)
13. General Donation
